

# Extended Listings

## Description

- Extended Listings is a class of POI products that typically includes hundreds of thousands of business listings for menu/category customization and enhanced destination selection
- These POI have been sourced from a third party and geo-referenced to HERE Map Content, but the quality of the content has not been verified

## Data Features

- Higher quantity POI product with expanded category choice and POI selection
- In some countries, we may map the POI to our defined categories. In other countries, we may not map to our defined categories. These products will all be similar in functionality but based on supplier categorization and attributes

## Availability

- Commercially available

## Format

- Available in POI-XML

## Coverage

- More than 38 million POIs in 43 countries and territories globally
