

Safety Cameras

Description

- Safety Cameras is a database of traffic cameras and radar zones linked to HERE Map Content
- This product enables applications to inform users about locations of speed cameras, radar zones, stoplight intersection cameras, speed limits and other traffic restrictions

Data Features

- The file contains types of cameras, X,Y positions and attributes to ensure that warnings come through to the driver of the car only when they are meaningful – avoiding false alerts (such as warnings for cameras that do not exist)
- Content is delivered in an external file

Availability

- Commercially available

Format

- Available in POI-XML

Coverage

- 172,483 cameras in 44 countries and territories globally
